HIGH SPEED TEXREJECT

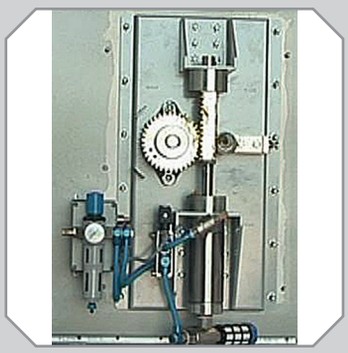
Eject gate for fibers in
pneumatic transport

- **Durable** - in Technology and Performance
- **Fast** - in Reaction and Maintenance
- **Flexible** - in Size and Application

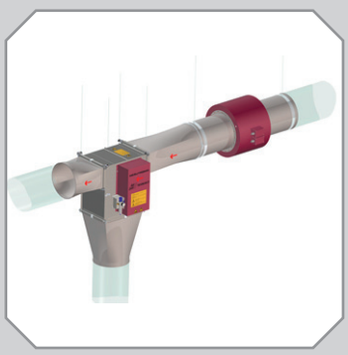
MESUTRONIC
Metal Detection made in Germany

In a few words:

- 300.000 eject events without visible wear
- Massive actuator components
- Full monitoring of the eject process



- Extremely fast reaction time under 50ms
- All system components easy accessible



- Size variations for different areas of use
- Suitable for pressure and vacuum conveying
- Optional with eject material collection system
